

Description:

This course will promote an appreciation of the awesome genius of God's living world by showing His fingerprint in every aspect of creation. Students will learn scientific principles which will set the foundation for becoming methodical note-takers and critical thinkers. A robust scientific vocabulary will be developed with the aim of using specific jargon when logically discussing and defending creation science. To test hypotheses and provide experimental evidence, students will conduct hands-on experiments and interpret the results.

Required materials:

- Exploring Creation with Biology, 3rd Edition Textbook
- Exploring Creation with Biology, 3rd Edition Student Notebook
- Pencils, colored pencils, eraser
- Lab fee to cover specimens, etc.
