

Vine Academy
7th Anatomy and Physiology 2026-2027

Anatomy and Physiology is a challenging, complex, and exciting class. We will cover the structure of the body as well as how the body's various parts work together. We will use the Apologia Exploring Creation with Anatomy and Physiology curriculum. The text has 14 lessons which include comprehensive reading material on each subject, a variety of in-class activities, and study questions. The Anatomy Notebooking Journal is the companion to the textbook and provides students with a place to keep class notes, homework assignments, and in class activities organized.

Tests for each lesson will be provided by the teacher and either given in class or proctored by parents at home. Students may **not** use notes, textbooks, or the internet for any tests. Students will have the opportunity to resubmit missed questions if they would like to improve their score. In addition to tests, intermittent quizzes will be given to ensure students are completing the reading assignments and staying on top of learning the material. Students will also complete mid & end of year projects.

Coursework will include reading assignments, lecture notes, homework questions, notebooking assignments, in class activities, and projects.

Grading:

1. Homework

- Lesson questions
- Notebooking assignments
- In class activities

2. Tests - 1 test per Lesson

3. Quizzes - approximately 1 per week (taken in class)

4. Participation

- Lecture notes
- In class review/activities

- Punctuality/attendance

6. Projects

- Midterm project
- End of year project

Required class materials:

Apologia Exploring Creation with Human Anatomy and Physiology (Young Explorer Series)
